Leadership: Leading teams, mentoring developers, balancing priorities

Experience

Sr. Software Engineer @ ATD

Feb 2023 - Present

- Technical lead for a team of Salesforce professionals
- Created an automated testing framework with Apex for flows and triggers
- Automated CI/CD pipeline with GitHub Actions to deploy code
- Enabled integration between Salesforce, Jira, and Slack
- Synced customer data between SFDC and micro-services with Python
- Worked on user sign-up service built with Python back-end and Angular front-end
- Helped implement e-commerce solutions in SAP Hybris

Salesforce Developer @ Deloitte

July 2019 - Feb 2023

- Led team through architecture meetings
- Oversaw quarterly releases for an application used by the federal government
- Automated data loading tasks using Python REST API wrapper
- Created Lightning Components using LWC and Aura frameworks

Salesforce Developer Intern @ Siemens

May 2018 - June 2019

- Maintained a Customer Portal in Experience Cloud for internal product inventory
- Wrote Apex code and VisualForce pages based on requirements from product owners
- Automated data migration in AWS S3 buckets

Projects

Go-Salesforce | [k-capehart/go-salesforce](https://github.com/k-capehart/go-salesforce)

- A Salesforce REST API wrapper written in Go

SF CLI Plugin | [k-capehart/kc-sf-plugin](https://github.com/k-capehart/kc-sf-plugin)

- A custom plugin for the Salesforce CLI that automates apex trigger generation written in TypeScript

Open Source Contributions

- Contributed to the official Salesforce CLI to implement a new authentication method
- Member of the Lightning Flow Scanner group, a collection of tools used to scan Salesforce flows for best practices

Education & Certifications

University of Central Florida

B.S. in Computer Science

Jun 2019

Salesforce Certifications

Platform Developer II

Mar 2024
