Salesforce: Apex, LWC, Aura, Flows, SFDX, SOQL, Sales Cloud, Service Cloud, Experience Cloud, Pardot

Languages: Java, Python, Go, TypeScript, JavaScript, HTML/CSS, SQL

Technologies: Git, GitHub Actions, Jira

Leadership: Leading teams, mentoring developers, balancing priorities

Experience

Lead Salesforce Developer @ ATD

Feb 2023 - Present

- Technical lead for internal Salesforce team
- Organized meetings, met with stakeholders, documented technical architecture
- Wrote custom API endpoints in Apex for external services to call
- Automated CI/CD release pipeline using GitHub Actions
- Set up code scanning automation to analyze code and flows for best practices
- · Worked on an onboarding app built with Python to sync data between Salesforce and a Postgres database
- Developed e-commerce solutions in SAP with Java and Angular (TypeScript)

Salesforce Developer @ Deloitte

July 2019 - Feb 2023

- Led Salesforce development team and oversaw releases for projects contracted by the federal government
- Created front-end components using Salesforce's Lightning framework (JavaScript, HTML, CSS)
- Built a weekly batch job in Apex that generated millions of lines of data and resolved long standing performance issues
- Automated data loading tasks using Python REST API wrapper

Salesforce Developer Intern @ Siemens

May 2018 - June 2019

- Maintained a Customer Portal for internal product inventory
- · Wrote Apex code and VisualForce pages in Salesforce based on requirements from product owners
- Automated data migration in AWS S3 buckets

Projects

Go-Salesforce | *k-capehart/go-salesforce*

- A Salesforce REST API wrapper written in Go
- Enables Go developers to interact with Salesforce and export/import large datasets

SF CLI Plugin | *k*-capehart/kc-sf-plugin

- A custom plugin written in TypeScript for the Salesforce CLI that automates apex trigger generation
- Includes a number of pre-defined templates using well known design patterns

Open Source Contributions

- Contributed to the official SF CLI, including a new authentication method and improved apex test result output
- Custodian of the Lightning Flow Scanner, a collection of tools used to scan Salesforce flows to enforce best practices

Education & Certifications

University of Central Florida

B.S. in Computer Science Jun 2019

Salesforce Certifications

Platform Developer II, Platform Developer I, Platform App Builder, Administrator
